### **Cupid’s Advice:**

No couple is perfect, but it can be hard to hold onto your relationship when things are especially rocky. You and your partner both need to work on your relationship. It’s easier said than done to fix the problems in your relationship. If you don’t know where to start, Cupid has some advice for you:

**1. Spend more time together:** Some relationships struggle when you don’t spend enough time together. Conflicting schedules and long-distance can take a toll on any couple, but it’s important to put the time into it. Plan a day to spend together each week. It doesn’t have to be elaborate: it can be a Netflix night in or a planned FaceTime call.
