

Fashion Tips: 7 Tips to Make You Look Slimmer

By Alycia Williams

Finding chic and slimming styles can be difficult. The slimmer look always has an elegant feel to it and it gives anyone a flattering silhouette, but if not done correctly then you can do the opposite and end looking bigger than you actually are. It's time for some [fashion tips](#) to keep us looking slim.

Here are some must know fashion tips to looking slimmer.

1. Wear dark colors: Darker colors instantly draw in attention

to all the right areas and it just draws your silhouette in. Embrace your little black dresses, black tops and jeans for that slimming outcome.

2. Wear waist belts: This will save you if you're wearing loose dresses that can make your figure disappear, by giving your waistline more definition. Get the medium sized or larger belts because the tiny ones won't really give you the slimming effect you're going for.

3. Wear vertical stripes: Horizontal stripes widen the body and you should probably avoid them if you want to look more well put together. The lines guide the eyes vertically rather than horizontally which is exactly what makes you look toned.

4. Get fitted clothes: This doesn't mean that you should wear very tight things because that also does the opposite of what you want here. The trick is to fill your wardrobe with items that are the correct size for you.

5. High waisted pants: High waists usually look better than any other type of trousers. Those that ride awkwardly along the waistline draw in attention in the wrong way. The beauty of high-waisted jeans is that they tuck in the tummy and define your figure immediately.

6. Wear heels: Heels were designed to elongate the legs which is an important part of creating that slimming, chic look. Those that work best are pointed toe heels and nude heels. Whatever style of heel you like, add a variety that are within these two categories and you'll never go wrong.

7. Choose smaller patterns: Small patterns are more subtle and they don't enlarge things like the bigger, bolder patterns.

They don't overpower your body and that also does a lot to narrow things down.

Beauty Tips: How to Combat Maskne

By Alycia Williams

Wearing a mask has become apart of our everyday lives, but some people are facing the hurdle of maskne, which is acne created from wearing a mask. Since we can't just stop wearing our masks, [beauty tips](#) are needed to prevent and treat maskne.

Here are some beauty tips for

preventing and treating maskne!

1. Skip your usual makeup: Wearing too many products under the mask can cause a build up on the skin. Forego wearing foundation, or pick non-comedogenic products under the mask to allow your skin to breathe. This is especially true if you work out in your mask.

Related Link: [Fashion Tips: 5 Ways Mask Fashion Can Elevate Your Look](#)

2. Wash your mask after every use: It removes any acne-causing bacteria and oils from the mask. Use hot water, laundry detergent, and white vinegar, which has antibacterial, antiviral, and anti fungal properties. Be sure to look for a laundry detergent that is fragrance-free, as leftover fragrance residue can also irritate skin.

Related Link: [Beauty Tips: How to Treat Oily Skin](#)

3. Exfoliate and hydrate: In addition to your daily washing, the two most important steps in your skincare routine that can help maskne are an exfoliating cleanser and a hydrating moisturizer. Swap your gentle cleanser for an exfoliating version three nights per week.

4. Spot-treat: If you're already experiencing a crop of mask-related pimples, you can use a spot treatment containing salicylic acid, sulfur, zinc, or 2.5 percent benzoyl peroxide.

5. Consider a retinol: Now is also a good time to hop on the retinol bandwagon, if you haven't already. Retinol speeds cell turnover, which prevents dead skin cells from clogging your pores. Start by using several nights a week with a pea-sized amount and gradually increase the frequency.

6. Try a stronger OTC treatment: This product changes the way the skin cells develop from the inside out and works well for

blackheads and clogged pores. You can usually find these products over the counter.

7. Create a barrier: When maskne shows up as skin irritation, you may need a “barrier” product to protect your delicate skin. A thin layer of Healing Ointment applied to the irritated skin just before putting on your mask works wonders.

Fitness Tips for Working Out While Wearing a Mask

By Alycia Williams

During the pandemic it's really important that we wear masks when going outdoors, but going on your morning runs can seem really difficult with a mask on. Wearing a mask should not exempt you from continuing with your exercise regime, but what is true is you need to know a few [fitness tips](#) before you embark on masked fitness, whether you are a seasoned athlete or just an enthusiast.

Here are some fitness tips for working out with a mask on:

1. Start slow and easy: Using the mask will increase the feeling of air hunger resulting from the accumulation of carbon dioxide, and what you need to do is gradually decrease your sensitivity to CO₂. The best way to decrease your sensitivity and increase your tolerance to CO₂ is to slow down your breath and train yourself with nasal breathing before your workout.

Related Link: [Health Advice: Exercise Is a Complementary Medicine for Chronic Conditions](#)

2. Prepare your lungs: If you just workout without preparing your lungs, you'll breathe fast and shallow, which makes you more prone to anxiety and performance fatigue. Before working out, start with a few slow breaths moving your belly and diaphragm. Your entire middle should expand as you inhale and squeeze as you exhale.

Related Link: [Fitness Tips: Mix Up Your Routine with These Celeb-Approved Workouts](#)

3. Breathe through your nose: Breathing through the nose will help you build up CO₂ tolerance, despite making you feel that you are not fast or efficient enough. You will leave fewer

water droplets on your mask and keep it drier while decreasing your exposure to viruses and pollution. Ideally, you have a few cloth masks in hand to change them, depending on the duration of your workout.

4. Ladies need to be extra careful: Women under the age of 48 need to be extra mindful, especially during their menstrual cycle. This is the time when your carbon dioxide levels drop by 25% caused by hormonal changes, and that typically means faster breathing, an increased heart rate, and a tendency towards fatigue and body pain, among other things. Be gentle with your body, take it easy and observe your body signals.

5. Find the right mask to workout in: Your comfortability is important, because if you're working out in a mask that is uncomfortable it'll lead to breathing heavier or not wearing it at all. Try out different masks and find that one that's right for you.

6. Plan for breaks: Although you may be used to doing your workout routine without any breaks, you may want to reconsider. Wearing a mask while working is going to create a different experience for your body which will lead to your body becoming fatigued easier. Plan for some breaks in between your workout .
