Food Tips: Juice Cleanses Do's and Don'ts

By Alycia Williams

Navigating juice cleanses can be so difficult. It can be hard to determine how, when, or why to do them. If you need some [food tips](#) on juice cleanses, today we're going some over some do's and don'ts. Here is the [food advice](#) for this [food trend](#).

In these food tips, check out some

advice for juice cleanses.

1. Do choose a cleanse that's right for you: There are so many different kinds of juice cleanses, and there is definitely one that is right for you. Some people have pressed juice only, others just cut out things like alcohol, caffeine, processed or refined foods, sugar, gluten, common allergens and animal protein. Most people feel much more energized and satiated when they include lean protein, and/or raw veggies and fruits they can chew, rather than juices that are gone in a few gulps. It's perfectly OK to "cherry pick" from various plans to create a program that feels right for you.

2. Don't do it to be trendy: If you're going to do a juice cleanse, make sure it's because you really want to do it and not because your friend is doing one. Those who follow trends usually have a much harder time sticking to it, and when people who aren't really committed to cleansing their body do them, they end up binge eating after the cleanse.

Related Link: [Food Trend: What's With the Keto Diet?](#)

3. Do use the cleanse/detox as a gateway to a healthier lifestyle: When you finish the juice cleanse, do your best to keep a healthy diet. You can open up your diet to more than just vegetable juice, but try to stay away from sugar-filled foods and drinks.

Related Link: [Food Trend: 5 Benefits of Lavender Lemonade & Tea](#)

4. Don't start working out consecutively: The juice cleanse is made to clean your body of previous unhealthy eating and toxins, not to lose weight or gain muscle. If you start working out while having this limited eating diet, you're in for the worst. You'll experience dizziness, tiredness, and nausea. Wait until after you finish the cleanse to then start

working out.

5. Do stay hydrated: Make sure that you're not just relying on the juice to keep you hydrated. Drink water as well. 8-10 glasses a day is perfect to go along with your juice. Herbal teas are helpful as well.

6. Don't ignore hunger pains: If you ignore your hunger you'll be subjecting yourself to some harsh side effects. If you get hungry just simply munch on a fruit or vegetable.

7. Do try it with a friend: Since juice cleanses can be so difficult especially when you get tired of eating fruits and vegetables doing it with a friend can be fun and you guys can keep each other on the cleanse. It can also be a fun and healthy experience together.

8. Don't end the cleanse without transitioning: After only drinking and eating fruits a vegetables it is important that you don't jump into eating in large portions. Take your time and ease into those larger meals.

Food Trend: Top 5 Reasons You Should Eat Imperfect Food

By [Mara Miller](#)

We've got some fun [food advice](#) for you! Everyone does it—you see a banana turn brown, so you either throw it into the freezer for a smoothie at a later date or it goes straight into the trash because it's no longer perfect. As a society, we have trained ourselves to only look for flawless produce because we perceive it as healthier to consume rather than an apple that is misshapen or two carrots that grew together. For that reason alone, 40% of food grown in the US goes uneaten. A recent [food trend](#) is now encouraging people to eat more imperfect food.

The latest food trend sheds light on a new perspective surrounding imperfect food. Here are five ways avoiding oddly-shaped food can be a

bad thing:

1. It's harder on farmers: Have you ever grown your own garden? Not every tomato will come out perfect, but would you waste it? Some might have a tiny bit of scarring or may have grown funny. Farmers lose money when there isn't a market for their imperfect produce, which most often rots before it can reach you, the consumer.

Related Link: [Food Trend: 5 Best Mocktail Recipes2019](#)

2. It's bad for the budget: Have you ever bought green tomatoes for your fried green tomato recipe, but then got upset because it's starting to turn red? Or got upset because your lettuce has wilted? Pause next time before you throw out a fruit or vegetable because it no longer looks perfect. Romaine lettuce, in particular, can be broken from the heart and placed in a cup of water for a few minutes before you put it on a sandwich to help it become firmer. Put your new red tomato on the sandwich too and try to let go of the impression that everything *has* to be perfect for you to eat it.

Related Link: [Food Trend: Probiotic Products](#)

3. Hungry people: According to research, 30 million Americans go hungry each year. Imagine how many people you could help if you donated imperfect food you don't want to a food bank or a soup kitchen in your area? This way, if you can't bring yourself to eat the scarred fruit or misshapen vegetables, at least donating it will ensure that a struggling family gets to have something nutritious and healthy.

Related Link: [Food Trend: Rolled Ice Cream](#)

4. It hurts the environment: When perfectly good food ends up being wasted because it doesn't meet certain criteria, you have therefore wasted the resources like water, fertilizer, and cropland. These resources used to grow the food that could

have otherwise gone to the farmer's land for something else. Think about this next time you look for the perfect green pepper or onion!

5. It's contributing to global warming: Food that ends up in a landfill because it is uneaten adds methane to the air, a greenhouse gas that is 23 times more potent than CO₂. If you are environmentally conscious and this alarms you, think about how much the effects of rotting food could be reduced if everyone would start eating imperfect food. There would be less waste, fewer people would go hungry, and it would help our agricultural community.

Are there any other reasons you might want to try eating imperfect food? Do you think you might change the way you shop for produce? Let us know in the comments below!

Food Trend: Rolled Ice Cream

By Megan McIntosh

It's not really a [food trend](#) unless it's Instagram-able, and rolled ice cream is definitely pretty to look at. This unique dessert originated in Thailand and has made its way to the United States, becoming especially big in cities like Los Angeles. This sweet treat allows all the flavors to be rolled into one in a special way.

This new Thai food trend is taking over our taste buds:

Here's what you need to know about this rolled ice cream phenomenon:

1. It's fun to watch: You get to see your ice cream treat being made right in front of you. The worker pours a milk-based liquid (there are vegan options) on an extremely cold metal surface. Once it freezes into a creamy texture, they can add your chosen toppings and flavors, scrape it flat, and roll it back up into a cup.

2. It's like you get to play with your food: Or rather watch someone play with your food. It's definitely an Instagram moment to watch the flavors you chose come together on the frozen metal. Once it's rolled up in your cup, you can eat it with a spoon. If you really want to get a taste of all the flavors, though, try eating it with chopsticks. It's a fun challenge and a chance to eat the ice cream as is without smashing everything further.

3. Stir-fried ice cream is its nickname: What? Though this ice cream is not made in a hot wok, the idea is similar. Instead of stir-frying it, you're churning it with metal knives. Eating this treat is a chance to try a dessert from abroad without getting on an airplane.

Food Trend: Probiotic Products

1. Olives: Wait, what? Olives are considered a probiotic? Look for naturally cured olives. It's better if you can get olives of a Spanish variety. Not only are they a tasty snack, but eating about five is a great way to get your daily dose of probiotics—just be careful not to eat too many. Olives are

packed with salt.

4. Probiotic Shots: This might not sound particularly appetizing, but probiotic shots are packed with the good bacteria you need for your gut. They can either be mixed in a morning smoothie or swallowed down like a shot of whiskey...only they're a *lot* healthier for your body.

5. Supplements: Supplements are the next obvious choice in a probiotic product you can use to introduce good bacteria into your body if gut shots or probiotic foods seem unappetizing. Taking a supplement is a simpler solution, giving you the probiotics you're missing in your diet.

4. And the next step: In a 2-quarter saucepan, melt butter over medium heat. Add onion and cook for 2 minutes stirring it frequently, until its tender. Stir in flour, salt, and pepper until its well blended. Steadily add in your broth and milk while stirring, cooking and stirring until it bubbles and thickens. Add your chicken and vegetables and remember to keep stirring. Next, remove from heat. Spoon into crust-lined pie plate.

5. Second to last: Go to your refrigerator and grab the dough you rolled earlier and roll it out on a lightly floured surface into 11-inch circle. Then softly fold the dough into quarters. Placing dough over the filling, then unfold it. Be

sure to trim, seal and crimp or flute edges.

6. Bon Appétit: Bake for 30 to 40 minutes or until your crust is a golden brown. Then during the last 15 to 20 minutes of baking, cover the edge of crust with strips of foil to prevent excessive browning. Take it out of the oven and let it stand for 5 minutes and then eat up!
