One-piece swimsuits are a great [fashion trend](#) because they are made for all of us. Different styles fit well on different body types. What is also great about them is that they come in various designs and styles, so it's easy to be fashionable and sport your personal style while being at the beach or by the pool. One-piece swimsuits were not the sexiest thing back in the last couple decades, but now they are sexier than ever!

Here are five types of one-pieces

that will have heads turning at the beach this summer:

Remember that besides using the following styles, you can play with other aspects of it like colors, patterns, and prints. The options seem limitless when you consider that along with the design of the swimsuits. One-pieces are great for all body types, but some are a better fit for you based on your body type. Here are some of the sexiest styles for you this summer, in no particular order:

1. Strapless:

Want to show off your shoulders more than usual? Then go strapless, it's an obvious way to accentuate them. Strapless swimsuits are usually best for women with a small bust because you won't have a hassle wearing them properly. You can also use padding, ruffles, and horizontal stripes to make your bust appear bigger.

2. One shoulder:

A one shoulder swimsuit helps balance broad shoulders and a wide back. A swimsuit with ruffles helps even more. Illusion is everything sometimes, and it's the case for this one-piece because of its asymmetry style.

3. High neck:

These are best for those of us with a short torso. The high neck swimsuit gives the illusion of a longer torso, by seemingly adding more inches.

4. Halter:

Halter swimsuits help accentuate your girls when their big. So if you have a big bust, and want to draw attention to it, you can't go wrong with a halter style. Also, go for ones that come with push up padding to hold them up.
