Do star charts fascinate you? You can tell a lot about yourself just by looking at the stars the night you were born if you have a solid understanding of astrology and the zodiac. And, even if that's not your thing, stars are still amazing because they remind us that the Earth is only one tiny speck in a much larger universe.

What if you could chart the moment

your heart skipped a beat when your partner became your husband or wife? The Night Sky star charts make this possible.

The star catalog is used to render the positions of the stars for any date or location in the past or future (so you can get your wedding night printed before it happens for a special [date night!](#)).
