**How does your relationship grow after you have kids?**

**Cupid's Advice:**

Children are supposed to bring joy to your life, but really they can either solidify or destroy a relationship. Cupid has some way your relationship can grow after having kids:

**1. Quality time:** You're working more closely together now and are taking turns with the children. This can help enhance communication, and it's something you handle as a team. Also, those times you do get to relax, it's nice to have your partner there to cuddle.

**2. Support system:** Both of you will be stressed out at first, especially if it's your first child. A baby is a big adjustment, and you both need to make sacrifices. Vent to each other and reassure your partner that you're in this together.

**3. Family matters:** After marriage, this is a tremendous factor in your relationship. Not only are you spending the rest of your life together, but now you're raising a family. Do what Brad and Angelina do-include the kids whenever possible, but admire and take advantage of the alone time you guys get.
