What are some signs to look for when you think your mate may

be cheating?

Cupid's Advice:

You have a good feeling that your partner is cheating, but how do you know for sure? Here are some common signals:

1. Work habits change: If your significant other is suddenly working late or at odd hours, you may want to look into the real reason behind it. It very well may be career-related, but it's best to make sure.

2. Privacy: If your significant other demands more privacy, there may be a reason. If he begins password-protecting his computer, hiding his credit card bills or isn't comfortable allowing you to use his phone, you should make sure to ask why.

3. Behavior changes: If your lover is spending less time with you, and more time on the phone or they can't account for where they've been, question them. If you're immediately accused of being too suspicious, and your questions are never answered, then something is definitely wrong.
