How do you know when you've found "the one"?

Cupid's Advice:

Dating around can get confusing, and it's sometimes hard to know when you've found the person you're meant to be with long-term. Cupid has some advice:

1. The spark doesn't fade: Even after months of dating, you still get butterflies in your stomach when you go to see your partner. That's a sure sign that the connection you have is likely not to fade for some time.

2. You feel secure: Security is a great thing in a relationship. If you don't feel as if something small could throw your relationship off, it shows that you're committed to making your relationship work far into the future.

3. You trust each other: Part of security means trusting one another. You should have no doubt that your partner will never cheat on you, for one. If you question it, you may want to re-think whether he/she is "the one."
