By Jennifer Ross

You're out one Thursday evening getting a drink with the girls after work when you make eye contact with a 6'2 Ryan Reynolds look-alike who is staring at you from across the bar. The good news: Blake Lively is nowhere in site! You really want to make the first move and approach him but your friends persuade you to stay put. Before you even have time to decide what to do, you notice that he is passing the DJ booth and making his way towards the dimly lit corner where you're standing. He

kindly introduces himself and as the two of you chat, your mind makes a mental note about him. He's nice, he's funny, he's hot and yes, he's single. The night is going well! You definitely want to see him again, but there's one catch: you don't feel comfortable giving him your cell phone number. You've had some pretty bad experiences giving out your personal information to guys. What do you do?

You're in luck! Now you can have a second, private phone line that rings to your cell phone, eliminating the need to worry about losing your information – or the guy – ever again. [MyAKA](#) is a product that offers you a second cell phone number in your local area code, allowing two mobile numbers on one phone. The second phone number works just like your primary cell phone number. It includes full voice and text message support in the United States and Canada, easy number blocking and unblocking, and a Do Not Disturb feature that sends calls to voice mail and stores text messages when enabled. Your assigned phone number from MyAKA is not linked to your user information in any way. So unlike forwarding services, your primary phone number is protected on incoming and outgoing calls. Best of all, there are no apps, downloads or Internet required. All features are controlled via text message. Hesitant about giving it a whirl? **MyAKA is giving you a seven-day free trial.**

A 7 Day FREE Trial?! What's the catch? None. With this special
