

Help Your Pet Make a Good First Impression On Your New Partner with Comfort Zone® Products

This post is sponsored by Comfort Zone® products.

By Whitney Baker

You're ready to have your new man over to your place for the first time, but there's one big (and furry) problem: your sweet but very-protective St. Bernard doesn't warm up to strangers easily. Rather than take out his uncomfortable and uncertain feelings on your guests, he usually chews up a few pairs of shoes and barks until the neighbors call to complain. You understand that pets can get stressed when their environment changes – and an unfamiliar person in their territory is certainly a big difference.

Lucky for you, Comfort Zone® products help reduce stress-related behavior in dogs and cats by mimicking their natural pheromones and allowing them to feel calm and comfortable. The products are 95% effective at reducing scratching and urine marking for cats, and also help reduce excessive barking and chewing in dogs.

[Comfort Zone® with D.A.P.®](#) (Dog Appeasing Pheromone) products for dogs helps control excessive barking, destructive digging, chewing and house soiling – leaving you with plenty of time to entertain your boyfriend on his first (and hopefully not last) visit. Plus, Comfort Zone® products will help your four-legged friend make a better impression on your partner.

In addition to helping your dog or cat feel comfortable with your new man, Comfort Zone® products can help manage stress-related behavior in your pet caused by thunderstorms and loud noises such as fireworks as well as transitions such as moving into a new home, being left alone more frequently or traveling.

Comfort Zone® products are available at pet specialty stores including PetSmart and PetCo, independent pet stores and online. You can learn more about Comfort Zone® products at www.petcomfortzone.com or on their Facebook page.
