What are some ways to bond with your small child?

Cupid's Advice:

Your little one seems to be growing so fast. How can you enjoy your time with them at this young and create memories that they will remember forever? Cupid has some ideas for you:

1. Rituals: Utilize everyday activities to create memories for your child. Sing them a goodnight song every night or have a family game night. Even something small like making pancakes together every Sunday morning. These are rituals that will last as your child gets older.

2. Be silly: Don't be afraid to be silly and laugh with your child. Children always have a silly sense of humor but they don't expect adults to have the same kind of humor so when you show them your silly side, they feel more connected to you.

3. Alone time: Spend time with each of your children separately. Take them out for ice cream or go play in the park together. This way your children will feel the love that you have for them individually.
