## **Fitness Trend: Exercise Snacking**

By Nicole Maher

Many of us began the new decade with high hopes of our fitness

New Year's resolutions. However, with the shut down of gyms across the country and drastic changes to our daily schedules due to the pandemic, these goals may have appeared unachievable. Faced with these new circumstances, many people began to turn to the new [fitness trend](#) of exercise snacking as a way of staying in shape, or beginning their fitness journey.

## **Find out some of the benefits of the new fitness trend, exercise snacking.**

The question is, what is exercise snacking? Despite its name, it does not involve any food. Instead, exercise snacking refers to the act of breaking down a workout into five minute intervals throughout the day rather than completing it all in one sitting. Learn about the benefits of this new phenomenon:

**1. Fits into a busy schedule:** Whether we are working, attending classes, or spending time with friends and family, it can be difficult to devote an hour or more to working out during the day. Exercise snacking is a great way of breaking down workouts into smaller sections that you can fit between all the other activities in your day. Moving your body for five minutes before you leave for work or ten minutes before dinner can help you fit working out into your schedule without forcing you to compromise time on something else.

**Related link:** [Fitness Trends: 5 New Fitness Trends to Keep Up With in 2020](#)

**2. Great way to get started:** If you are just beginning your fitness journey, exercise snacking is a great way to start. Jumping straight into a two-hour workout when your body is not used to it can sometimes cause more harm than good. By taking part in the fitness trend of exercise snacking, you are

allowing your body to warm up to new movements. Over time, you can increase the amount of five-minute circuits you do a day, or transition to longer workout sessions once your body has adapted.

**Related link:** [Fitness Tips for Working Out While Wearing a Mask](#)

**3. Useful addition to existing plans:** While exercise snacking is a great way to begin a fitness journey, it does not have as many benefits for those who are already deep into their fitness plans. However, it can still be a useful addition for the days that you can't make it to the gym or set aside a large amount of time. Rather than forgoing exercise for the entire day, try exercise snacking in the spare time you have between tasks to keep yourself on track for your fitness goals.

**4. Forgo the gym:** There are many reasons people choose to avoid the gym. Whether you do not feel comfortable in a gym setting, or are concerned about the current health conditions around us, exercise snacking is the perfect way to workout from home instead. Many of the exercises found in plans surrounding this new fitness trend only require an exercise mat or a few weights, and can easily be accomplished from the comfort of your living room.

**5. Master the moves:** Exercise snacking is the perfect way to learn a new move. Rather than switching between exercises every set, you are spending the entire five minutes working on one move. This will allow you to really focus on nailing the move and strengthening that part of your body rather than thinking about what exercise you are going to do next. Once you have this move mastered, it will be much easier to complete accurately if you eventually move to a longer workout routine!

# Fitness Trend: How CBD Can Be Used In An Exercise Plan

While exercise is an integral part of a healthy lifestyle, it can be challenging to maintain a regular habit because of the workout effects on the body. After exercising, the body sustains muscle pain and inflammation. In most cases, you have two options to choose from: to bear the pain and continue working out, or allow the body to heal first before picking up your workout routine again.

CBD, or cannabidiol, products are gaining popularity because it promises huge benefits, specifically in treating the body. Right now, there are products infused with [CBD for athletes](#), bodybuilders, and fitness-minded individuals. They sing the praises of different CBD products they've used as part of their exercise regime.

If this is your first time hearing about how CBD can be helpful in an exercise plan, you should stick around to learn. Perhaps, it can help you decide if it's worth incorporating into your routine.

## **In terms of an exercise plans, some notable ways to use CBD are as follows:**

### **1. As a Supplement for Pre-Workout**

CBD products are known to have stimulative effects. Taking CBD supplements before exercising can boost energy levels and improve a positive attitude without any known adverse effects. With increased energy, you end up doing more training than what you typically do. As a result, you build your stamina and strength while placing your body in a good workout condition.

Also, taking a CBD supplement before working out minimizes the breakdown of muscles while exercising. Taking the [best CBD for pain](#) is the solution to lower your body's sensitivity to pain, so it becomes bearable during training sessions.

Nowadays, there are many brands of supplements infused with CBD to optimize overall performance, including in working out. If you're new to CBD supplements, choosing which brand may be confusing. The best way to start is to ask a friend or someone you know for a recommendation.

## **2. As a Post-workout Health Drink**

Sometimes, a healthy CBD health drink, mixed with lemon or pineapple juice, after a workout can offer you several good things. One of the many ins and outs of CBD includes the normalization of your body's metabolism.

It's known that stress impedes metabolism. By drinking CBD products with stress regulating effect, you keep your metabolism on a healthy balance. CBD also aids in the body's natural endocannabinoid system. This system is responsible for maintaining the homeostasis inside your body, including mood, metabolism, and appetite. CBD enhances all of these aspects by creating harmony inside your body.

Don't forget to stock some healthy CBD infused health drink at home to feel relaxed and refreshed after your exercise routine.

## **3. As a Daily Tincture**

Taking CBD as sublingual is one of the best ways to absorb it in the body. Its benefits include reducing inflammation, better sleep, and lower blood pressure.

After a grueling exercise, your body sustains inflammation. Whether you're weightlifting or running, the muscle fibers in the body break down, and it becomes inflamed. Taking a CBD tincture can alleviate the joint inflammation acquired from a heavy lift.

CBD helps your body recover faster after exercising, too. Compared to just letting the body heal naturally, the anti-inflammatory properties of CBD support your body's recovery. Moreover, it's challenging to get a night of good sleep when your body is sore and in pain. But, by using CBD to reduce the inflammation, you get a good night's rest.

CBD tinctures can be bought in any health food store. Before

buying, ask from a store clerk if they have any guide to CBD products you can check, which is helpful when trying out CBD products.

#### **4. As a Healing Stick**

There are other ways to take CBD or use it, but healing sticks are the best when it comes to decreasing muscle soreness. Using healing sticks help you feel relaxed after exercising.

CBD has been found to have painkilling effects, so it's a helpful remedy with aching muscles. Just apply the healing stick to any joints or muscles after working out. Depending on the brand of the product you use, visible effects may appear at varying times.

#### **5. As a Leg and Foot Cream**

Apart from the muscles and joints, CBD can also be made into creams that you can use to relieve your legs and feet of any discomfort, especially if you're into running.

Right after your training, you can apply the cream to massage on your legs and feet. Doing this eases the tension and improves blood flow, thus reducing soreness and inflammation. If you do this, by the next day, you can certainly keep running.

#### **Conclusion**

The things you learn today are just partial uses of CBD relative to exercise. With studies about it continuing, it won't be a surprise to know that in the future, it'll become a product present in every household. What's important right now is you know it can be a significant factor in your morning routine because of the vast array of benefits it gives.

# Fitness Tips: How to Shed Holiday Weight After the New Year

By [Ahjané Forbes](#)

As we welcome the new year, we plan to draft our resolutions. The majority of our new commitments will be to lose weight. Sometimes, this process can be tricky and may not always go as planned. However, it is important to make mistakes and learn from them to make a healthier you!

# What are some [fitness tips](#) to help ring in the new year?

Attempting to lose weight can be hard, especially if you're trying to do it around the holiday season. Make sure that this is something that you want to do, and you're not just succumbing to pressure from others. Avoid losing weight for a better body image, and focus on the [health benefits](#). Here are some [fitness advice](#) on how to get through one of the most difficult resolutions:

**1. Create a realistic goal:** Don't make a New Year's resolution stating that you're going to lose 30 pounds by Easter. That'll only put more pressure on yourself. Think of short term goals like walking 10,000 steps per week. If you're on your feet a lot, this will be easily obtainable. Be honest with yourself. If you know you definitely don't want to try a new sport or sign up for that Zumba class, then don't do it. Find something that you will enjoy doing. Losing weight with a group of friends will give motivation as well.

**Related Link:** [Health Trend: Intuitive Eating](#)

**2. Slowly eliminate your guilty pleasures:** It will not be easy to stop eating candy, chocolate, fast food, unhealthy snacks, and drinking soda. Start small. If you're used to buying a 24 pack of soda, then lower your consumption to a 12 pack. Let's say you eat two bars of chocolate every day. Begin by only eating one per day. This will help you to curb your habit and begin to see your weight change.

**Related Link:** [Fitness Tips: Mix Up Your Routine with These Celeb-Approved Workouts](#)

**3. Ease your way into the gym:** As soon as the ball drops, don't just head to the gym. Create a workout plan that will benefit you. For example, if you know you cannot run a mile,

start off by only walking one fourth of it. Also, it is okay to not go to the gym. You can do most exercises within the comfort of your own home. A lot of trainers have online videos that you can watch and do in your living room. Do something simple like stretches or yoga, and heighten your intensity level from there.

**4. Just dance:** A lot of people forget that dancing is a good form of exercise. You can go to classes that are geared toward losing weight and having fun. Many of the group members are making their way through this just like you. It will be easier to build a connection with them and learn from their experiences.

**5. Keep a positive mindset:** If you keep thinking that you're not going to lose enough weight by a certain time, then you will not actually do so. Even if you lose one pound in one month, try to celebrate that. It's all about progress. Learn to understand your body. Be proud of what you are doing even if the process might take a long time. Move at your own pace.

**6. Reward yourself:** Now we know we mentioned you should slowly eliminate your guilty pleasures, but sometimes we all need a little cheat day. If you're on a diet, take one day out of each month where you eat until your heart's content. Keep the date you set consistent. If you start on January 15th, make sure that on that day every month you fully indulge. This will actually give you something to look forward to each month and you'll start to feel good about yourself. Remember, you still have to get across the finish line. So, always remember to stick to your diet and drink plenty of water, and you'll definitely get through this year's New Year's resolution a winner!

# Fitness Trend: Move Away from Your Dependence on Technology

By [Katie Sotack](#)

Admit it: technology has become an addiction. It's easy to get lost trying to grow your following on social media. You've maybe gotten so wrapped up in a game on your iPad you've forgotten to wash your work clothes for the next morning, too. Consumers are reclaiming [fitness](#) as a time to disconnect and recommit to [health](#). The gym, which had become flooded with big screens and Fitbits, has now become a place to find solitude.

**As technology integrates further into our lives, how can we achieve mindfulness through this unplugged [fitness trend](#)?**

Mindfulness is the act of bringing one's attention to the current moment. Psychologists recommend it as a way to deal with emotional distress and to live life to its fullest. The task has become increasingly more challenging as we've become more attuned to our screens and less invested in the physical space around us. Here's some [fitness advice](#) to help you unplug and lead a healthier life:

**1. Go harder:** To maximize a full workout, mindfulness is essential. The presence of a phone or other distraction limits the workout by dividing attention and providing a slower tempo for movement. It's suggested that songs with high BPM (beats per minute) increase the speed of a workout. Plus, with distraction comes bad form. Give your body the respect it deserves by focusing on structure and engaging muscle groups, ultimately disconnecting from life and experiencing a workout your health and the impact of the workout.

**2. Breathing:** 2019 has seen an increase in breath-focused fitness like yoga and swimming. A key component to mindfulness is meditation, which largely focuses on breathwork. Exercises that stress the importance of deep and measured breath will aid in focusing the mind. The 'breathe through the pain' mantra of yoga will bleed into everyday life. Even emotional challenges will feel less stressful as you take measured breaths to remain calm. Plus, there's the added benefit of regular exercise, which leads to increased endorphins. By participating in an exercise that emphasizes breathing, a person will increase their mood and decrease their waistline simultaneously.

**Related Link:** [Celebrity Diet: Does Going Vegan Hurt Your Health?](#)

**3. Fatigue:** Constant tiredness may be brought on by stress,

chronic pain, or trouble sleeping. A mindful workout, which focuses on a strong mind-body connection, will alleviate all of the above. Psychologists use the connection to adjust lifestyles and attitudes. When a person is cognizant of their entire being, emotional wounds and physical pains begin to heal. This phenomenon happens by processing our emotions and therefore healing that which plagues us. A mindful workout is a great start to both emotional and physical health (and should exercise alone work for you, it's a lot cheaper than never-ending doctor's appointments).

**Related Link:** [Fitness Trend: 5 Ways Hot Yoga Melts Away Calories](#)

**4. Alertness:** A downside to our constant internet connection is that we as a species have become horribly unaware. People cross busy Manhattan streets without looking up from the movie on their phone. Friends' voices have become background noises to our texting. Taking an hour a day to workout unplugged reminds us that it is possible and can feel *amazing*. Ever heard of runner's high? The endorphins of a full-fledged mindful workout are off the charts. You'll feel superhuman, pushing your body and mind to the limits and not caring about the time spent away from your screen. Plus, a strong mind-body connection makes people more aware in everyday life. You'll begin to pick up on details your brain had been filtering out as well as upping your quick-witted banter skills.

# Fitness Trend: Isometric Strength Training

By [Mara Miller](#)

Isometric strength training is a [fitness trend](#) that involves exercising in place. It focuses on the way the muscles are supposed to move with no crazy movements like tossing a tire or bouncing around. You don't even need weights to do this type of strength training—the point is to tighten up your muscles without even moving.

# Find out more about this fitness trend!

If you find these [fitness tips](#) are working, you can do some research online to find more exercises to add to your regimen. Yoga, for example, is a type of isometric strength training. Remember, the best thing about this kind of workout is that you don't need equipment to do it. Be sure to always drink plenty of water and to warm your muscles up before your workout. Here are a few poses you can try if you're interested in isometric strength training:

**1. High Plank:** Get into the top of a push-up position and hold. Be careful not to put your butt up too high or too low. Hold it for as long as you can. This is a great exercise that works out your core and back muscles.

**Related Link:** [Fitness Trend: Help Your Neighbors!](#)

**2. Prayer Pose:** If you do yoga, you probably know of this pose. You stand still and place your hands together like you're praying. Only, with this isometric strength exercise, you're actually pressing your palms together to create some force and are thereby working out your muscles. Be sure not to hold your shoulders up high because it can cause them to get too tense. This is a great workout for your chest.

**Related Link:** [Fitness Trend: 5 Benefits of Pole Dance Classes](#)

**3. Forearm Plank:** This is similar to the high plank, but you are holding yourself up with your forearms. Be sure with this pose not to lift your butt too high or too low like in the other position. It helps to work out your abs since you are placing your muscles in a different position.

**5. You're providing help to people in your neighborhood who need it most:** There may be people in your neighborhood who may have heart conditions or other health problems that prevent them from shoveling snow. Start a Facebook group for your neighborhood and ask that your neighbors post some jobs they need completed. It doesn't have to be limited to shoveling, there's other physical labor that you can do for exercise and just to help out.

# Fitness Tips: 7 Ways to Speed Up Weight Loss

By [Mara Miller](#)

Do you need to shed a few pounds, but you aren't sure where to start? Weight loss can be rewarding; both in the "yes!" moment when you fit into your old college jeans and for the health benefits, including more mobility and a decreased risk in health issues.

# **Losing weight isn't something that will happen overnight, but it can be kick-started under the right conditions. Here are seven fitness tips that can help speed up weight loss:**

**1. Get enough sleep:** Proper rest does a lot for your body. If you're lacking sleep, it can cause your metabolism and cortisol levels to drop, resulting in weight gain, even if you're trying to work out and eat healthy. While you won't automatically drop twenty pounds, getting enough sleep at night will ensure that you won't eat more during the day.

**Related Link:** [Fitness Secrets: 5 Simple Tips to Stay Healthy](#)

**2. Never skip breakfast:** Skipping breakfast, or any meals, is a big no-no when it comes to losing weight. Your metabolism will slow down, you'll get hungrier later in the day, and you'll possibly get a migraine. Instead of eating a huge plate of bacon, eggs, and toast, try a smaller breakfast with a plate of fruit and a side of Greek vanilla yogurt. Or, if you're really pressed for time, grabbing a handful of grapes or another fruit for your morning commute is better than not eating at all.

**Related Link:** [Fitness Trend: 5 Best Workout Apps](#)

**3. Stay away from sugar:** Sugar addiction is real—especially common with refined sugars—and it's a serious problem that can pack on the pounds. Staying away from sugary drinks, cookies, and other sweet treats can help speed up weight loss since you aren't taking in the empty calories that your body doesn't know what to do with before it stores it as fat. Aspartame and

other fake sugar alternatives can make you hungrier, working counter-productively to help you shed the pounds. Instead, try a natural alternative, Stevia, which comes from a plant and is 200 times sweeter than sugar. This means you need less. And the best part? It acts as a zero-calorie sweetener that you can use in coffee or bake with the next time you want cookies.

**Related Link:** [Fitness Tips: Incorporate Superfoods in Your Diet](#)

**4. Choose healthy snacks:** It's easy to default to a bag of chips, a big old jar of french onion dip, and snack like crazy while you're binge-watching the latest season of *Grey's Anatomy* or *The Bachelor*. Instead, try a handful of peanuts, almonds, or an apple. Hummus and high-fiber crackers are a healthy option for those heavy series-binging nights.

**5. Take care of your gut:** Did you know that the bacteria in your gut can influence your weight? Studies show that if the gut isn't healthy, then it can be hard for you to digest the foods you need to eat in order to be healthier. It can even influence when your stomach tells you if you are hungry or not, the vitamins your body absorbs, and how food is digested. Introducing probiotics to your body can have a positive effect on the bacteria in your gut. Consider consuming more fermented foods like sauerkraut or Kombucha. You can also purchase probiotics online or in your local pharmacy.

**6. Drink lots of water:** Our bodies are dependent on water. It can suppress appetite, help aid in waste removal, and helps after you've had a really intense workout, among several other benefits. The regular recommendation is to drink at least eight glasses of water a day. That isn't always easy. Here's an extra tip: you can drink tea too, and it will count as your water intake. It can also ease the dread of trying to drink so much water when you may not like to drink it plain.

**7. Keep a food journal:** Knowing exactly how much you're eating

and when you're eating it can be helpful when you're trying to lose weight. While all of your fat isn't going to speed up overnight, you can track how much water and tea you're drinking, write down your favorite recipes, yoga poses, and thoughts about your weight loss journey. You can do this in a blank notebook or in a book that is specifically geared toward weight loss if you need more structure.

# Fitness Trend: Cold Therapy

By [Haley Lerner](#)

Cold therapy, or cryotherapy, is one of the coolest (pun intended) [fitness trend](#) going on right now. Cold therapy is when you apply something frozen or cold to an area of your body to treat pain. There are various methods of cold therapy, such as icepacks, ice massage, whirlpools, ice baths or coolant sprays. We've got some reasons why cold therapy is one of the best ways for managing pain.

# Check out our [fitness tips](#) on why cold therapy is a great pain management option for you!

**1. Pain relief:** Cold therapy is a great pain relief option instead of pain relievers. Cryotherapy can reduce swelling and sensitivity to pain. Cold therapy is very useful directly following an injury, as it constricts blood vessels to reduce blood flow to the area, limiting inflammation and muscle spasms.

**2. Burn fat:** By exposing yourself to the cold, you activate brown adipose tissue, or BAT. BAT helps produce energy and oxidize fat in muscle tissue. By using cold to activate BAT, your body generates heat, raises your metabolism and burns off fat.

**Related Link:** [Fitness Secrets: Chia Seeds Are the Superfood You Need In Your Life](#)

**3. Be more alert:** Nothing wakes you up more than a cold shower. Cryotherapy can be a great option to help you focus and stimulate your mind to be more awake during the day.

**4. Better your mood:** Some studies show that cold therapy can actually increase your mood. Since there are a high density of cold receptors in the skin, a cold shower can actually send a huge amount of electrical impulses from peripheral nerve endings to the brain. This can then result in an anti-depressive effect.

**Related Link:** [Fitness Tips: How to Stretch In the Morning](#)

**5. Increased immunity:** Cold therapy can apparently help your immune system, as thermal stimulus to cold gives your body an increased tolerance to stress on your body. So, your body is better equipped to handle any diseases thrown at it.
