What are the advantages of an older partner?

Cupid's Advice:

Kiele Sanchez is six years Zach Gilford's senior, so what makes this age difference work? Cupid has some thoughts:

1. More life experience: With an older partner, more

experience is brought to the table and you can learn from those life experiences.

2. Maturity: Especially when it comes to men, older age equals a higher level of maturity. Those petty things you used to fight about with other partners fall by the wayside with an older beau.

3. Stability: Often times with age comes more stability in life. Having an older partner may mean that you fall into a more stable lifestyle.
